

KIBAG makes runway safe.

Competent and reliable airport construction.

KIBAG. For a good reason.

Perfect systematic solution.

Committed and competent. KIBAG Airfield Construction AG is your ideal partner for inventory projects as well as market driven implementation meeting your requirements. Motivation and know-how of our employees signify the utmost importance to successfully realize your construction project. That's why we value a cooperative working atmosphere combined with permanent education. Our focus fosters competences through a holistic way of thinking and a great knowledge of the best practice to efficiently implement construction solutions.

Innovative and sustainable. Keep going means keep thinking. KIBAG makes its best efforts to implement your construction projects as economically and environmentally consciously as possible. Our constant search for even more efficient and environmentally friendly methods, state-of-the-art-machinery-and-equipment parks allowing a careful use of resources are included. We therefore sustainably improve standards of living as well as work and life qualities for anyone involved in the construction process, starting at the construction phase.

Certified and individual. To build with KIBAG systematically leads to success. We look forward to taking care of your challenge and to presenting our tailor-made solutions for your construction project!

Gladly there for you:

Ulrich Widmer

Managing Director KIBAG Airfield Construction AG,
Zurich (Switzerland)

You can rely on KIBAG.

KIBAG – Your powerful Swiss construction network.

KIBAG Construction Services. The businesses of KIBAG are located throughout Switzerland and offer a full range of services in the fields of road construction, civil engineering, hydraulic engineering, special civil engineering, dismantling, drilling, utilising sewer technology and drilling for and installing geothermal probes. The construction businesses are complemented by KIBAG Infra, which considers itself a total construction service provider in the infrastructure sector, with construction support and technical service departments in full responsibility of all workshop services.

KIBAG Building Materials. KIBAG is one of the leading producers of building materials in Switzerland. We produce gravel, sand, grit and ballast, operate gravel and concrete plants, maintain storage sites, supply ready-mixed concrete and mortar, operate a concrete pump and throughs service and our own testing laboratory. We ensure with our own, highly developed logistic systems that building materials always reliably arrive where they are needed.

KIBAG Disposal and Recycling. KIBAG recycles and disposes of hazardous construction waste and performs soil as well as subsurface decontamination. The recovered products are reused as high-quality recycled building materials.

The KIBAG Company – solid values since 1926. KIBAG supports people in their need to continually rebuild the world and stands for experience, competence, performance and quality. The KIBAG Company employs approximately 1800 people at more than 60 locations throughout Switzerland and actively assumes its responsibility towards society and nature.
